

# EQUIPMENT SERVICE AND REPAIR

Properly maintained and serviced equipment is the key to having a safe and enjoyable diving experience.

## AIR FILLS

Quality air fills are provided from our on-site 9.5 cfm Max Air Compressor

## HYDROSTATIC TESTING

Hydrostatic tests for scuba cylinders are required every 5 years. ProTech Scuba llc will provide you a tank (free of charge) if one is needed while yours is being serviced.

## VISUAL TANK INSPECTIONS

After hydrostatic testing and every year after, ProTech Scuba llc can visually inspect your tank(s). Using the protocol set up by Luxfer, you can rest assured that quality inspections are our number one priority.

## PARTIAL PRESSURE NITROX FILLS

ProTech Scuba llc has the ability to fill your nitrox dedicated scuba cylinder with enriched air nitrox (up to 80%). Don't know about the benefits of diving with nitrox, come in and ask our technician or sign up for a class. ProTech Scuba llc can also fill your dive specific emergency oxygen cylinder.

## NITROX CLEANING

Interested in converting your equipment to nitrox? ProTech Scuba llc will clean your equipment and make it nitrox compatible. It is essential to have a cleaned, nitrox dedicated cylinder when diving nitrox.

## REGULATOR REPAIRS

Remember, even if you haven't dove recently, your regulator needs serviced annually. ProTech Scuba llc will service almost any regulator.

## BUOYANCY COMPENSATOR REPAIRS

BCD's rarely require servicing, but annual checks are essential. ProTech Scuba llc can clean, repair and replace the damaged parts of most BCD's.

TANKS	\$\$\$
Air Fill	\$10
EAN32 Fill	\$15
EAN36 Fill	\$19
Scuba Tank Hydro Test	\$30
Visual Tank Inspection (w/Fill)	\$20
